Tableau User Story | Sales Performance

Sales Dashboard | Requirements

Dashboard Purpose

The purpose of sales dashboard is to present an overview of the **sales metrics** and **trends** in order to analyze **year-over-year sales performance** and understand sales trends.

Key Requirements

KPI Overview

Display a summary of total sales, profits and quantity for the current year and the previous year.

Sales Trends

- Present the data for each KPI on a monthly basis for both the current year and the previous year.
- Identify months with highest and lowest sales and make them easy to recognize.

Product Subcategory Comparison

- Compare sales performance by different product subcategories for the current year and the previous year.
- Include a comparison of sales with profit.

Weekly Trends for Sales & Profit

- Present weekly sales and profit data for the current year.
- Display the average weekly values.
- Highlight weeks that are above and below the average to draw attention to sales & profit performance.

Customer Dashboard | Requirements

Dashboard Purpose

The customer dashboard aims to provide an overview of customer data, trends and behaviors. It will help marketing teams and management to understand customer segments and improve customer satisfaction.

Key Requirements

KPI Overview

Display a summary of total number of customers, total sales per customer and total number of orders for the current year and the previous year.

Customer Trends

- Present the data for each monthly KPI for both the current year and the previous year.
- Identify months with highest and lowest sales and make them easy to recognize.

Customer Distribution by Number of Orders

- Represent the distribution of customers based on the number of orders they have placed to provide insights into customer behavior, loyalty and engagement.

Top 10 Customers By Profit

Present the top 10 customers who have generated the highest profits for the company
Show additional information like rank, number of orders, current sales, current profit and the last order date

Design & Interactivity Requirements

Dashboard Dynamic Requirements

- The Dashboard should allow users to check historical data by offering them the flexibility to select any desired year
- Provide users with the ability to navigate between the dashboards easily
- Make the charts and graphs interactive, enabling users to filter data using the charts.

Data Filters

- Allow users to filter data by product information like category and subcategory and by location information like region, state and city.
